</table>
| September 10th     | Dr. Yumi Kim  
A. Jaramillo-Lambert  
Johns Hopkins University  
Department of Biology | “Molecular control of meiotic chromosome dynamics”                              |
| September 17th     | Dr. Iqbal Hamza  
Y. Yien  
Department of Animal and Avian Sciences  
University of Maryland | “Heme Trafficking: Lessons from Bloodless Worms”                               |
| September 24th     | Dr. Zhengyu Ma  
E. Selva  
Nemours  
Alfred I. DuPont Hospital for Children  
Biomedical Research Program | “Adoptive T Cell Therapy for Severe Allergic Diseases”                          |
| October 1st        | Dr. Xinnian Chen  
C. Kirn-Safran  
University of Connecticut  
Department of Physiology and Neurobiology | “Instructional methods in STEM classroom inclusion”                             |
| October 15th       | Dr. Yi-Hsien Su  
J. Song  
Associate Research Fellow  
Development and Evolution  
Academia Sinica, Taiwan | “Evolution of Developmental Mechanisms: Insights from body axial patterning in sea urchin and acorn worm embryos” |
| October 29th       | Dr. Carole LaBonbe  
S. Wei  
Northwestern University  
Department of Molecular Biosciences  
Evanston, Illinois | “Soybean bradyrhizobia and their phages—remarkably unexplored terrain”         |
| November 5th       | Dr. Jeffry J. Fuhrmann  
E. Selva  
University of Delaware  
Department of Plant & Soil Science  
Seminar for Joint Faculty Appointment | “Soybean bradyrhizobia and their phages—remarkably unexplored terrain”         |
| November 12th      |                                                                                             | Seminar for faculty recruitment                                               |
| December 3rd       |                                                                                             | Seminar for faculty recruitment                                               |
